	Examiner Joshua D. Zimmerman	Art Unit 2854	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 07/15/2004 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as obvious over Garner et al. (US 5,562,031) in view of Vermeersch (EP 0 770 494 A2).

Vermeersch teaches a "method of carrying out lithographic printing using a plate having an image recording layer capable of being developed with dampening water and/or ink" and "bearing a recorded image, mounted on a plate cylinder" (column 2, lines 55-column 3, line 16). Vermeersch lacks the "dampening roller and/or form roller having a surface speed differing from the surface speed of the plate." Garner et al. teach a printing press and "method of carrying out lithographic printing" wherein the dampening roller has a "surface speed differing from the speed of the (printing) plate" (column 2, lines 1-13; figure 1, figure 6). It would have been obvious to one of ordinary

skill in the art at the time of the invention to incorporate the variable speed rollers of Garner et al. in the on-machine development process and press as taught by Vermeersch in order to quickly and efficiently begin producing clean, well-developed images.
